

# RESTART CHALLENGE RULES

## 1. Definitions

"Solver" means any natural or legal person who participates in the challenge by uploading his or her solution to the vgen.it platform.

"Target companies" are companies for which the proposed solution has or could have a real implementation.

## 2. Use of solutions

By participating in the challenge, the solver consciously accepts that his solution can be sent to an indefinite number of target companies.

If a target company, interested in the solution of a solver, shows interest in implementing such solution, VGen LAB S.r.l. will facilitate the dialogue between the company and the solver to start an open innovation design process.

Other external partners may intervene to support the design of open innovation.

VGen LAB S.r.l. is not responsible in any direct or indirect way for any inappropriate use of the solutions by the companies that will receive them.
